Version Control

Version	Date	Description
0.1	17-10-2024	Initial setup Test Report (TD)
0.2	17-10-2024	Added tests of user stories
0.3	14-11-2024	Added more tests of user stories
0.4	11-12-2024	Added dashboard tests
0.5	18-12-2024	Changed layout document
0.6	19-12-2024	Added first page
0.7	04-01-2025	Added all tests for what we will realize
0.8	06-01-2025	Language fixes
1.0	08-01-2025	Document ready

2.15. Manage users 16

1. Introduction

This document provides a detailed outline of tests that have been created, executed and which tests are yet to be done. Each test corresponds to an acceptance criterion for a specific use case or represents a general functionality test. By covering all these aspects, this document offers a comprehensive overview of the entire functionality developed and implemented. Ensuring that all features meet the required standards and perform as expected in various scenarios. In addition, it helps in identifying potential areas of improvement.

All tests have their unique number that connect itself to the Functional Design document. For each test there are two slots available to add if the test is succeeded/failed, date of test and tested by, the first slot is for the initial test and the second slot for the regression test.

For the traceability of the tests throughout this document, the following explains what each identifier is.

Identifier	Description
P<#>	Principle
FR<#>	Functional Requirement
NFR<#>	Non-Functional Requirement

2. Tests

2.1. Principles

#	Name	Test	Expected Result	Result	Date of Test	Tested by
P1	Responsive design	Check if the website is responsive on mobile and desktop.	The website is responsive.	Correct	28-11-2024	Ben
				Correct	18-12-2024	Ben
P2	Frontend has been tested by Cypress.	Automated tests should run through the website.	All tests will succeed.			
P3	Backend has been tested by Unit Tests.	Automated tests should run through the REST API.	All tests will succeed.			
P5	All features and functionalities should prioritize the end user's experience, focusing on ease of use, accessibility, and intuitive interaction.	Do a lighthouse test and see if the accessibility is above 90/100.	The end score of accessibility is above 90/100	Correct	18-12-2024	Matz
				Correct	06-01-2025	Jens
P6	The design, terminology, and interactions should be consistent across all parts of the project, ensuring users can navigate and use the system without confusion.	Check if the design across the website matches with each other and the design in Figma.	Design matches with Figma.	Correct	29-10-2024	Ben
				Correct	12-12-2024	Matz

P7	Security best practices must be adhered to, ensuring data protection, authentication, and authorization standards across all features.	Check if the dashboard is secured by login and cannot access it without logging in.	User will see a login screen when trying to open the dashboard and is not logged in.			

2.2. Deploying

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR0.1	The prototype is successfully deployed to a live or staging environment.	Check if the prototype is on keuzewijzerhboict.nl/nieuw.	The prototype is working and visible.	Correct	14-11-2024	Ben
				Failed Prototype has been put offline in favour of the product being deployed.	18-12-2024	Ben
FR0.2	The prototype is accessible via a URL or other access points.			Correct	14-11-2024	Ben
				Failed Prototype has been put offline in favour of the product being deployed.	18-12-2024	Ben
FR0.3	The deployed prototype works on multiple devices			Correct	14-11-2024	Ben
				Failed Prototype has been put offline in favour of	18-12-2024	Ben

				the product being deployed.		
FR0.4	Deployment should include any necessary documentation or instructions for testing the prototype.			Correct	14-11-2024	Ben
				Failed Prototype has been put offline in favour of the product being deployed.	18-12-2024	Ben

2.3. Show graduate profiles

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR1.1	The system shows the available graduate profiles.	After selecting the available cohorts, check if there is a list of available graduate profiles.	A list of multiple graduate profiles should be visible.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR1.2	The system should ensure the list is updated with current profiles based on the program curriculum.	Check all the created profiles are shown.	A list of the created graduate profiles should be visible.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR1.3	The system must keep showing the graduate profiles after one has been selected.	Click on a graduate profile and see if you can still select other graduate profiles.	It is possible to switch between multiple graduate profiles after selecting one.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
NFR1.1	A graduate profile should			Correct	02-12-2024	Jens

	have its own color, so it can be visually separated.	Check if the graduate profiles have their own unique color.	All the graduate profiles have unique colors.	Correct	18-12-2024	Ben

2.4. Select study year

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR2.1	When opening the webpage for the first time it should show a list of years that can be selected when a student started their study.	Open the website and check if a list of study years is visible.	There is a list of available study years.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR1.2	The current selected study year can be changed	Select a study year, then select another one.	The new study year is selected.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR2.3	If a study year does not meet the new curriculum requirements, it should open the old Keuzewijzer	Click on the study year that says “2023 of eerder”.	After clicking that study year, it should open the old Keuzewijzer.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben

2.5. Select graduate profile

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR3.1	When opening the webpage, it should show a list of graduate profiles that can be selected to view the path you have to	Open the website, click on a study year, then click on a graduate profile.	The graduate profile is selected, and the route of that profile should be visible.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben

	take to graduate to that specific graduate profile.					
FR3.2	The current selected graduate profile can be changed.	Click on a graduate profile, click on another one and see if it changes anything.	The new graduate profile is selected and the route changed to the selected profile.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
NFR1.2	Each graduate profile should have its own unique color.	Check if in the list of graduate profiles if there are unique colors.	All graduate profiles should have unique colors.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben

2.6. Select study route

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR4.1	Show a path that shows the study year	Open the website, click on a study year, click on a graduate profile.	The study route of the graduate profile is shown.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
NFR1.3	The path matches the color of the selected graduate profile.	Open the website, click on a study year, click on a graduate profile.	The study route has the same color as the graduate profile.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR4.2	Per study year there are 2 sections where a cluster can be followed.	Check if in the study route there are 2 slots per year (autumn and spring semesters) to fill in clusters.	There should be 2 slots per available per year in the study route for clusters.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR4.3	If there are multiple	Check if in a slot if there	There should be a stacked/opened list	Correct	02-12-2024	Jens

	clusters available in a section, make sure that they are stacked and can be opened to select a cluster that a student likes.	are multiple clusters can be stacked and opened to hide or show them all.	of clusters in the given slot.	Correct	18-12-2024	Ben
NFR1.4	When the last study year has been finished, it should show a graduate hat icon.	Go to the end of the study route and see if there is a graduate icon hat.	A graduate hat is shown at the end of the study route.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR4.4	Shows free choice if available.	Check if there are slots available for free choices.	Free choice slots are shown.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben
FR4.5	Propaedeutic should be fixed.	Check if at the start of the study route the propaedeutic clusters are at the start.	The propaedeutic clusters are in the first slots before another cluster can be done.	Correct	02-12-2024	Jens
				Correct	18-12-2024	Ben

2.7. View cluster information

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR5.1	If a link is available for the cluster, it should show a link button.	Check if in a cluster a button is visible with an 'I' on it	A button with the 'I' is visible in the cluster.	Correct	24-11-2024	Jens
				Correct	18-12-2024	Ben
FR5.2	A new window should be opened when clicking on the information.	Click on the button with the 'I' and see if a new window will open.	A new window opened to show further information about the cluster.	Correct	24-11-2024	Jens
				Correct	18-12-2024	Ben

NFR1.5	If there is no link available for the cluster, it should show a grayed-out link button.	Check if the 'I' button is grayed-out when there is no link available.	A grayed-out button with the 'I' is shown.	Correct	24-11-2024	Jens
				Correct	18-12-2024	Ben

2.8. Insert free choice

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR6.1	The system should allow students to select a cluster during the designated free choice year.	Click on a graduate profile, click on the free choice spot and click on a cluster.	The selected cluster should put on the free choice spot.			
FR6.2	The available clusters should be presented in a list.	Click on the free choice spot, see if a list opens with clusters.	A list opens with clusters available for that spot.			
FR6.3	Students should be able to view prerequisites for each semester before selection.	Click on the free choice spot, see if a cluster you want to select needs a prerequisite semester.	The system will notify you that you need a prerequisite for the cluster you want to follow.			
FR6.4	The system should notify students if a selected semester conflicts with program requirements.	Open the free choice spot, click on a cluster that can't be followed in your path, because you need a prerequisite.	The system will notify you that you can't follow this cluster, because you need a prerequisite for that cluster.			
FR6.5	The selected choice should	Click on the change	The new selected cluster will be put on			

	be able to be changed easily.	button of the cluster and select another cluster.	the spot of the previous cluster in the free choice spot.			

2.9. Retake cluster

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR7.1	The system should allow students to retake a failed cluster.	Click on the change button of the cluster that you have failed.	A new spot in the study route will appear where it's possible to retake the failed cluster.			
FR7.2	If the retaken cluster can be followed the semester after the failed cluster, it should be able to retake the failed cluster.	Click on the change button of the cluster that you have failed and see if it puts it in the next slot after the failed cluster.	The next spot after the failed cluster will contain the same cluster again to retake it.			
FR7.3	If the retaken cluster can't be followed the semester after the failed cluster, that spot should become a free choice spot and the cluster to retake goes to the first possible spot where it can be taken.	Click on the change button of the cluster you have failed and see if it puts a free choice spot in the next slot.	The next spot after the failed cluster will contain the free choice spot and then after the next possible slot of the failed cluster it will fill it in there.			
FR7.4	The system should notify students if it's not possible to retake a failed cluster after	Click on the change button of the cluster that you have failed.	The system will notify you that the cluster can't be followed the semester directly after the cluster, it			

	the failed cluster.		will show the next available spot of the failed cluster.			

2.10. Login dashboard

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR8.1	There should be an input for the username/email of the administrative account	Go to the login page and test if there is an input field for the username/email	The input field for username/email is visible and functional.			
FR8.2	There should be an input for the password	Go to the login page and test if there is an input field for the password.	The input field for password is visible and functional.			
FR8.3	There should be a button that lets you login	Test if there is a button to initiate the login process.	The login button is visible and functional.			
FR8.4	Inputs should be validated for SQL or code injections	Test if the inputs are validated against SQL or code injections by.	Inputs reject malicious code and SQL injection attempts.			
FR8.5	A message should be shown for invalid credentials	Input invalid credentials and test if a message is displayed.	"Invalid username or password" message is displayed when credentials are incorrect.			
FR8.6	Login should only succeed if the username and password match stored credentials	Test if login succeeds only when username and password match stored credentials.	Login succeeds when credentials are correct and fails otherwise.			
FR8.7	There should be a "Forgot password?" link to recover login details	Test if the "Forgot password?" link is functional and redirects to password recovery.	Clicking the link redirects to the password recovery page.			

FR8.8	The system should lock the account after 5 failed login attempts	Test if the account locks after 5 failed login attempts.	Account is locked after 5 consecutive failed attempts.			
FR8.9	After successful login, the user should be redirected to the dashboard	Test if the user is redirected to the dashboard after a successful login.	Successful login redirects to the dashboard.			
FR8.10	Password should be stored securely using hashing/encryption techniques	Test if the password is securely stored using hashing/encryption techniques.	Passwords are hashed and stored securely in the database.			
FR8.11	Session expiry.	Test if the session expires after 30 minutes of inactivity.	User is logged out after 30 minutes of inactivity.			
NFR1.6	The interface should display a loading indicator while the login request is processed	Test if a loading indicator is displayed while the login request is processed.	A loading spinner or similar indicator is visible during processing.			
FR8.12	Login process should work across all supported browsers and devices	Test if the login process works across all supported browsers (e.g., Chrome, Firefox) and devices (desktop, mobile).	Login process works seamlessly across supported browsers and devices.			

2.11. Reset password

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR9.1	There should be a "Forgot Password?" link on the login page.	Test if there is a "Forgot Password?" link on the login page.	The link is visible and functional on the login page.			

FR9.2	The link should direct the user to a password recovery form.	Test if the link redirects to a password recovery form.	Clicking the link redirects the user to the password recovery form.			
FR9.3	There should be an input field for entering the username.	Test if there is an input field for entering the username.	The form has a visible and functional input field for the username.			
FR9.4	An email should be sent with a secure token for password reset.	Test if an email is sent with a secure token for password reset.	A reset email with a secure token is sent to the registered email address.			
FR9.5	Token expiry.	Test if the token expires after a predefined period (e.g., 30 minutes).	The reset token expires and becomes invalid after 30 minutes.			
FR9.6	If the user enters an invalid email, an error message should appear.	Test if an error message appears for an invalid email address.	An error message like "Invalid email address" is displayed for non-registered emails.			
FR9.7	The system should validate the token before allowing a reset.	Test if the system validates the token before allowing a reset.	Password reset proceeds only if the token is valid and has not expired.			
FR9.8	There should be input fields to enter and confirm the new password.	Test if there are input fields to enter and confirm the new password.	Form includes fields for entering and confirming the new password.			
FR9.9	The new password should follow defines complexity rules.	Test if the new password adheres to defined	New password must meet rules like minimum length, special characters, and alphanumeric mix.			

		complexity rules.				
FR9.10	A success message should be shown after a successful reset.	Test if a success message is shown after a successful password reset.	A message like "Your password has been successfully reset" is displayed after completion.			

2.12. Manage graduate profiles

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR10.1	The system should display a list of graduate profiles.	Go to dashboard and click on manage profiles.	The system shows the graduate profiles.			
FR10.2	The maintainer can add a new graduate profile via a form.	Go to manage profiles and make a new one.	A new graduate profile gets created.			
FR10.3	The maintainer can edit existing graduate profiles.	Go to manage profiles and edit a graduation profile.	The changes are saved.			
FR10.4	The maintainer can delete a profile with confirmation.	Go to manage profiles and delete a graduation profile.	The graduation profile is deleted.			
FR10.5	The system should validate data before saving changes.	Go to manage profiles and edit a graduate profile and check if the system validates the changes.	The system validates the changes to the graduation profile.			

FR10.6	All operations should be logged for auditing purposes.	Go to manage profiles and make a new graduation profile and delete one.	The system has logged the changes.			

2.13. Manage cohorts

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR11.1	The system should display a list of cohorts	Go to dashboard and click on manage cohorts.	The system shows the cohorts.			
FR11.2	The maintainer can add a new cohort via a form.	Go to manage cohorts and add a new one.	A new cohort gets created.			
FR11.3	The maintainer can edit existing cohorts.	Go to manage cohorts and edit a cohort.	The changes are saved.			
FR11.4	The maintainer can delete a cohort with confirmation.	Go to manage cohorts and delete a cohort.	The cohort is deleted.			
FR11.5	The system should validate data before saving changes.	Go to manage cohorts and edit a cohort and check if the system validates the changes.	The system validates the changes to the cohort.			
FR11.6	All operations should be logged for auditing purposes.	Go to manage cohorts and make a new cohort and delete one.	The system has logged the changes.			

2.14. Manage clusters

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR12.1	The system should display a list of clusters.	Go to dashboard and click on manage clusters.	The system shows the clusters.			
FR12.2	The maintainer can add a new cluster via a form.	Go to manage clusters and add a new one.	A new cluster gets created.			
FR12.3	The maintainer can edit existing clusters.	Go to manage clusters and edit a cluster.	The changes are saved.			
FR12.4	The maintainer can delete a cluster with confirmation.	Go to manage clusters and delete a cluster.	The cluster is deleted.			
FR12.5	The maintainer can associate clusters with graduate profiles.	Go to manage clusters and assign a cluster to a graduation profile.	The cluster has been assigned to the graduation profile.			
FR12.6	The system should validate data before saving changes.	Go to manage clusters and edit a cluster and check if the system validates the changes.	The system validates the changes to the cluster.			
FR12.7	All operations should be logged for auditing purposes.	Go to manage cohorts and make a new cohort and delete one.	The system has logged the changes.			

2.15. Manage users

#	Name	Test	Expected Result	Result	Date of Test	Tested by
FR13.1	The system should display a list of users.	Go to dashboard and click on manage users.	The system shows the users.			
FR13.2	The maintainer can add a new user via a form.	Go to manage users and add a new one.	A new user gets created.			
FR13.3	The maintainer can edit existing user information.	Go to manage clusters and edit a user.	The changes are saved.			
FR13.4	The maintainer can delete a user with confirmation.	Go to manage users and delete a user.	The user is deleted.			
FR13.5	The system should allow assigning roles to users.	Go to manage users and assign a role to a user.	The role has been assigned to the user.			
FR13.6	The system should validate data before saving changes.	Go to manage users and edit a user and check if the system validates the changes.	The system validates the changes to the user.			
FR13.7	All operations should be logged for auditing purposes.	Go to manage users and make a new user and delete one.	The system has logged the changes.
